

HECKMONDWIKE GRAMMAR SCHOOL

28th September 2018

Dear Parent/Carer

Syngenta Chemicals Community Science Labs Visit

We have been offered the opportunity to take approximately 45 students for a half day workshop activity at Syngenta, a world leading science company, based on Leeds road, Huddersfield on Tuesday 9th October 2018. The workshop is led by Syngenta Chemists with additional supervision from Heckmondwike Grammar School staff. The workshops are designed for Year 9 pupils and will provide:

- A 'student lab' experience with a variety of science demonstrations along with an experience of the equipment used in the chemical industry
- A tour of a production plant to see 'Chemistry in action'

Sessions will be in either the morning (9.30am start) or afternoon (1.00pm start for return to school at approximately 4pm) and transport will either be by school minibus or coach depending on the allocated session. Your child will need a packed lunch on the day. All activities have been fully risk assessed and if you require further details please contact me directly in school. If you would like to see a short video of their Community Labs in action please view this online story - <https://www.syngenta.co.uk/press-release/syngenta/community-science-lab-open-national-science-week>.

If you wish your son/daughter to attend then please complete the details overleaf in addition to the standard medical forms enclosed. We would be grateful if the form could be returned to the business office by Friday 5th October 2018. There are a limited number of places on the trip so please be prompt in returning your reply slip.

Yours faithfully

Garath Stott
