Week 25

Published 26/03/2021.

## And..... Rest!!

Despite this half term being the shortest of the year, we have certainly packed a lot in to it. It actually seems a long time ago that all our students were working remotely from home, but it is actually just 3 weeks ago. It has been wonderful to bring the whole school community back together, and not surprisingly everyone has settled in to the routine very well and it's almost like we had never been away.

I must give real credit to all the students and staff for the way they dealt with the mass testing. This was not an easy thing and there was certainly some apprehension from many people about coming back in to a community with lots of people, when for the previous 3 months people had been avoiding each other. Because of our collective vigilance and adhering to protocols, we have had very few positive cases and when they have occurred, we have been able to very quickly identify close contacts and make appropriate arrangements. Please do keep up the testing regime at home and report results through the school website link, as this is important in keeping us all safe during the coming months.

You will not be surprised that lessons have gone very well in the last 3 weeks in school, building upon the knowledge and skills gained during the remote learning phase. Please do be reassured that contrary to what the press and government might be saying, our students are absolutely on track and there is no need for any major catch-up plan.

As we know, our year 11 and 13 students have a lot on their plates at the moment, preparing for their final assessments after Easter, but we are all confident they will do an excellent job and we are looking forward to some outstanding results in the summer. For other students, my honest suggestion for the next 2 weeks will be to have a proper break. There has been so much going on in the last year that I do think we are all in need of hopefully some nice weather get some fresh air and then time to enjoy being together as families without the pressure of

Given that it is Easter after all, I think we are all allowed a slightly more generous allowance of chocolate. At the end of school today, we gave all our students and staff an Easter egg and attached to this letter is a photograph of 2 of our students, Eleanor Morris and Sam Jones delivering some Easter Eggs to the residents of Spen Court Care Home. It was nice to see some happy faces – socially distanced of course.

My very best wishes to you all, and thank you once again for your ongoing tremendous support.

Peter Roberts

studying from home.

## YEAR 8 DESIGN COMPETITION

## Winners

The recent design competition sparked a lot of interest amongst the very talented Year 8 cohort.

Judging was made difficult by the wide range of excellent entries which were submitted in response to a selection of design briefs:

- Repurposed cardboard packaging
   Design your own superbore
- 2. Design your own superhero
- 3. Design a new Star Wars vehicle4. Happy food

In completing the project, students were able to demonstrate their creativity not only in the task itself but also through the format in which they submitted their work.

We received tutorials, hyper-lapse videos, blogs, stop-motion animations and customer reviews!

Some students even wowed us with product modelling skills that certainly would look out of place in a GCSE class.

We cannot wait to see what these students are capable of producing over the next three years when they start their GCSE D&T and Food Preparation and Nutrition courses!

### **Book Reveiw**

Have you read a good book in lockdown? Would you like tell others about it and share your reasonings behind your recommendation?

Why don't you email a brief book review to adminofPce@heckgrammar.co.uk and we will share

### The Trials of Apollo: The Dark Prophecy

The Trials of Apollo: The Dark Prophecy is the second volume of The Trials of Apollo series, which follows the story of Apollo, the Greek god of archery, the sun, healing, plague, prophecies, music, poetry, the truth and light, who is banished from Mount Olympus under the alias of Lester Papadopuolous, a 16-year old flabby teenager with acne. His mission is to free all 5 oracles from Apollo's old nemesis, Python and 3 of the deadliest Roman emperors, one of which is Nero, the emperor known for playing the fiddle while Rome burnt. In this book, he travels to Indianapolis, USA with Leo Valdez, son of Hephaestus, and the sorceress Calypso. They soon find refuge in the Waystation, a magical building where demigods, friendly monsters and Hunters of Artemis usually stay for protection. He also learns the identity of the second emperor, the blood-thirsty Commodus and that they have to free the Dark Oracle of Trophonius.

He manages to turn his 12-year old emotionally awkward master, Meg McCaffrey, back to the good side as she is Nero's step-daughter and had betrayed Apollo in the first book. The best thing about this book, as is with all Rick Riordan books, is the humour and the knowledge it gives about Greek mythology. My favourite part is when Apollo drinks from the springs of Lethe and Mnemosyne before entering the cave of Trophonius. I like this part because Apollo, who is a pretty scared character, loses his senses and starts laughing at even the smallest of things. This shows an unexpected change in the character, which is unfortunately temporary. I think Rick Riordan has really outdone himself with this book and it has been a true pleasure reading it.

#### Review by Shivank Tiwari form 7H1

#### Maximum Ride- The angel experiment by James Patterson

The Angel Experiment is the first of ten books in the Maximum Ride series. It's about 6 kids (the "Flock") who are human-avian hybrids (98% human, 2% bird). These amazing kids have been experimented on as children in a place they call the "School", before they managed to escape, giving them amazing powers and each a set of wings. Now, they are on the run from Erasers, half-human, half-wolf, who are after the Flock. Now Max, Fang, Iggy, Nudge, Gazzy and Angel need to use their extraordinary abilities to prevent Ari- the leader of the Erasers- from taking them back to the School, where they will be perpetually tested and experimented on.

I would recommend this book to anybody who loves to read Science Fiction and Adventure books. I would definitely rate this book five stars!
