

# GEOGRAPHY

## STAFF

---

Mr Currie HOD  
Mrs J Bell  
Mr J Whittaker  
Mrs S Cole  
Mrs E Currie  
Mrs J Lawrence

## SUPPORT

---

Our department delivers support when asked for usually taking place within the school hours and arranged as and when required.

## INTRODUCTION

---

We follow the AQA specification covering six topics over the two years, your time will be divided between two teachers, each taking on different aspects of the course. In your first year you will cover 4 topics starting with The Carbon and Water Cycle for physical Geography and Contemporary Urban Environments for Human Geography.

## WHAT TO BRING FOR YOUR FIRST LESSON

---

We expect the students to bring with them the basic equipment required to study which is a full set of stationary at the very least. The department will provide everything else. We do require the students to bring with them an enquiring mind as the topics we cover are very relevant to the issues that exist today, we also expect students to engage with the lesson and to be an active part of any discussion that takes place, a grasp of current events is also something that we expect our students to bring to every lesson.

## CLASSWORK, HOMEWORK AND INDEPENDENT STUDY

---

We have high expectations of our students and expect all classwork to be reviewed at the end of every lesson, We also expect students to keep abreast of current events by either reading or watching the news. We expect students to fully engage with the homework this will be in the form of research and/or exam questions. There will be many chances for the students to go beyond what is covered in the lessons and we expect students to seek every opportunity to explore these.
