

PE A Level Bridging Work Overview

Please read through the attached PowerPoints and make notes as required. You have also been provided with examples of our GCSE past papers to test yourself and help you familiarise yourself with the content.

Please note that you will be required to complete a similar examination in September as part of the baseline assessments. For those students who have studied GCSE PE, this will act as a revision task, for those who have not studied GCSE PE or who have completed a BTEC, this will allow you to cover the core knowledge that you need .

In addition to these documents you have advised to access and read a publication that is available via our school library called PE Focus. This is an OCR A level PE specific journal that covers a range of key topics linked to the A level PE specification. I would recommend that you read articles linked to anatomy, movement analysis, skill acquisition and sports organisation in preparation for the course starting in Sept 2022.
